1971 Jimmy Dawkins went to Europe and when he was in Paris he took the time to record this album. The band is 2/3 French, the only American player is Mickey Baker on guitar (The Mickey Baker?). The liner notes tells it all: "Even the less informed listener will understand, in hearing this collection, the extent that this music, so charged with emotion and contained violence, corresponds to the mixed feelings of frustration and hope of the black population of the great American cities." Well, well. Anyway I kind of like this album, in my opinion it's one of the best of Dawkins European albums. --- hem.fyristorg.com
