The blues get served up hard, heavy and raunchy on the debut album from Chicago blues club legend Tail Dragger & His Chicago Blues Band. The 12 tracks here run the gamut from the modal "Don't Trust No Woman," six-and-a-half minutes of a non-stop trance groove, to the nastiest version of "Baby Please Don't Go" you'll ever hear, to the Jimmy Reed groove of "Cold Outdoors." With a straightforward, driving band featuring Studebaker John on harmonica, Rockin' Johnny Burgin on lead guitar, and Twist Turner on drums, a great song selection with seven of the 12 tunes emanating from the pens of either Tail Dragger or producer George Paulus, and an uncluttered production, this is one modern-day blues album that captures the spirit of Chicago blues in its classic period, yet in the here and now.
