Blind Willie McTell – *The Dyin' Crapshooter's Blues* – 3:04

Bluesville was a subsidiary of Prestige Records, and released many good blues albums over the years. This 3 CD set is a pretty good overview of the kinds of blues the label was recording and releasing. But another 3 CD set could easily be issued because there's so many great blues artists/songs available from that era. The sound is pretty good/good overall--like other sets from the Not Now Music label. And similar to other releases, there's no booklet, only a short essay about the label and a few of the artists.

Most of the blues on this compilation lean toward country blues, with a smattering of more sophisticated blues from people like Willie Dixon, Alberta Hunter, Victoria Spivey, and even Sunnyland Slim. Many of these artists you'll recognize--Lightnin' Hopkins, Memphis Slim, Pink Anderson, Big Joe Williams, Sonny Terry, Brownie and Sonny, Blind Willie McTell, Mercy Dee Walton, and others. Also included are a few female blues performers--Victoria Spivey, Alberta Hunter, Lucille Hegamin, and Mildred Anderson.

These tracks were recorded in the late 1950's/early '60s, when the folk-blues boom was just starting to happen. And as such they rely mostly on acoustic guitar, piano, and mouth harp for accompaniment, along with a small rhythm section. Bluesville was known (in the vinyl LP days) as a label for country/folk/blues and this collection has a number of good/great tracks from many artists. This compilation is a perfect foil to the more electric, post-war collections from the Not Now label. But as I've said before, not having a booklet with at least track/artist/song information is a disservice to many blues fans--especially those who are new to this type of music. But for the low price for so much great music I can't complain too much. And whatever information folks need can easily be found in the many books on blues artists/music, and on the internet. --- Stuart Jefferson, amazon.com
