2009 release from British guitarist Snowy White and his new Blues Project. Snowy first became interested in music at the age of 11 when he was inspired by Blues musicians Buddy Guy and B.B. King. He then made a reputation for himself playing numerous sessions for a wide variety of musicians, most famously as second guitarist with Pink Floyd augmenting the bands sound on the tours. More recently he has been an integral part of Roger Waters live band. In October 2008, Snowy formed The Snowy White Blues Project and the band recorded this debut album. ---cduniverse

CD is very representative of the live performance in terms of its content, and is tidied up a bit by the clever electronics of a studio recording. Its great to see that the Blues Tradition is live and well with old standards mixed with new compositions. Snowy has done a superlative job as the old master getting the best out of his 'pupils', often allowing them to be centre stage, while he takes an unassuming back seat, filling in almost imperceptably, but with panache and the skill of the talented experienced elder statesman, using his 40 yr old Gibson as if it was made to exude liquid strands of gold. A must for anyone interested in the evolving facets of the Blues genre. ---
