If, like me, you are seeking an introduction to the more well-known classics, then this should definitely fit the bill. The music is divided into individual categories: Relaxing, TV & Cinema, Romantic, Spiritual, Favourites, Spectacular. Though this is useful at times, I much prefer to listen to a random selection playing on my MP3 player. It has enabled me to identify pieces of music that I liked but was not able to name. It has also introduced me to pieces that I had not heard before and have come to enjoy. Since buying I do feel drawn to seek out quite a number of the complete works, which is exactly the inspiration I was hoping for. Not having purchased similar albums I am not able to compare but this does provide exactly what it claims to - and includes many beautiful pieces. It is excellent value for money, contains so many tracks and a lot of variety. I do not feel a need to purchase other similar combinations, which may have been the case if this had not proved as good. ---Deanne, amazon.com
