Titurel is a fragmentary Middle High German romance written by Wolfram von Eschenbach after 1217. The fragments which survive indicate that the story would have served as a prequel to Wolfram's earlier work, Parzival, expanding on the stories of characters from that work and on the theme of the Holy Grail. Titurel was continued by a later poet named Albrecht, who tied the story together in a work generally known as Jüngere Titurel (Younger Titurel).

The Albrecht is generally presumed to be Albrecht von Scharfenberg. He completed his continuation around 1272. Albrecht synthesized the fragments into a cohesive narrative and expanded it to over 6300 lines. He adopts Wolfram's narrative persona, and due to this the work was assumed to be Wolfram's own for many years. ---wikipedia
