advance of Mozart. Like most of his contemporaries, he was very prolific: Grove lists some sixty operas, the majority of them in the buffa genre. He was a leading figure in Neapolitan opera in his day, but, again like most of his contemporaries, his works barely outlived him. This was not a comment on the quality of his music, but on the nature of the operatic industry at the time which, almost the opposite of today's, relied on the constant production of new works. Until recently, Leo's operas were known only to a handful of music scholars, but as, after all, the market can only absorb so many recordings of *Le nozze di Figaro* and *Così fan tutte*, he has benefited from the general exploration of forgotten music that has been so remarkable a feature of the CD age. *L'ambizione delusa* is the fourth Leo opera to be recorded, the others being *Amor vuol Sofferenza* (1739), *Decebalo* (1743) and *L'Alidoro* (1740). For anyone interested in how his career developed, it is worth remarking a recording of his early dramatic serenata, *Diana Amante* (1717), too. None of the earlier recordings has made much impact and so far the attempt to revive interest in Leo has failed to generate the considerable excitement accompanying the rediscovery of the operas of his immediate contemporary and rival, Leonardo Vinci (c.1690-1730). Vinci did a better job of avoiding subsequent comparison with Mozart by abandoning opera buffa in 1722 and thereafter concentrating on opera seria. In his valuable biography of Vinci, Kurt Markstrom suggests that the two Leonards essentially 'changed places' at this juncture, Leo, who had shown an initial preference for opera seria, now taking over the buffa genre. --- David Chandler, musicweb-international.com
