This CD presents some of the works composed for the chapel of the University of Salamanca in the middle of the eighteenth century by Juan de Aragüés (ca. 1710-1793), an organist and harpist who would succeed Antonio de Yanguas as professor of the University of Salamanca. The repertory, in a style in which late Baroque and early Classical features overlap, included liturgical music and villancicos such as *¡Ah de las esferas!* (1743), for double choir, which gives the album its title. ---festivalubedaybaeza.com
