October, 1973: Ozawa was 38, freshly minted in his first season with the BSO, when this Damnation of Faust was recorded. No doubt it was a prestigious release, because after decades with RCA, the orchestra had decided to make a fresh start with DG, where they would be the label's flagship American orchestra. Looking back, this was something like a high point in optimism for the pairing of the BSO and Ozawa. He would all too quickly become a more uninteresting, at times uninspired, conductor. His great failing was lack of impact, which he tried

to compensate for with rather pointless refinement, even in Mahler and Berlioz, where it's the last think a conductor should be thinking about.

Happily, none of that matters in this recording, which is full of vitality and confidence. The Tanglewood Festival chorus has a full, rich, musical sound -- at long last a professional chorus that was worthy of a great orchestra. As the lead reviewer points out, Stuart Burrows sings resplendently, without the slightest fear of the high-flying range of his solos. He's not particularly French, but Faust has long been an international work. Too bad that Donald McIntyre's Mephisto so thoroughly lacks charisma, either for evil or wittiness. He bludgeons the role dramatically, with the affliction of bad French, but there's no denying that he's in excellent (and very loud) voice. Edith Mathis is musical and touching, but it wasn't the best idea to ask a soprano to fill out a role best sung by a mezzo with a high extension like Janet Baker or von Otter.

Symphony Hall, as great as it is for concerts, tends to be over reverberant for recordings, as it is here. There's a big back-to-front difference between the vocal soloists and the chorus, too. The student chorus seems to bawl their mock amen in Carlsbad Cavern. There is also a tendency on Ozawa's part to turn heavy handed when he should be nimble and alert. DG had already made acclaimed recordings during William Steinberg's brief interregnum after the departure of Erich Leinsdorf, so this one should also have been superior. It has plenty of visceral impact, however, and may play better on systems other than mine. --- Santa Fe Listener, amazon.com
