Giovanni Battista Pergolesi only lived to be 26 years old. While he had gained some reputation after a six year career as a composer, the circle was still small. His fame spread posthumously and the demand for his compositions grew. The problem is that there are only a few dozen of them.

Instrumental music traditionally attributed to Pergolesi makes up an imposing corpus: six small concertos for strings, six concertos and three sinfonie for various instruments, sixteen trio-sonatas, one sinfonia (sonata) for cello and bass, one sonata for violin and bass and over twenty sonatas for harps-ichord and organ.
