Greek Byzantine Choir Lycourgos Angelopoulos - conductor

These are hundreds to over a thousand year old Byzantine hymns, of ancient beauty and devotion. Features one of the best chanters (Psalti) and choruses, Angelopoulis, who also appears on several CD's of ancient Roman chant (was Byzantine in style) done by Harmonia Mundi label's Marcel Peres, who brings to life ancient church music. The melodies are often in a minor key, are of great beauty and the words are from or paraphrased from the Bible. Entrancing. Getting an English translation would make it easier to appreciate if you don't know Greek; see the booklet. One of the best. ---Karl Schulte, PMA,, amazon.com
