Leszek Mozdzer, is a giant of jazz scene in Poland, that can be only compared to Tomasz Stanko in terms of artistic output and influence. Lars Danielsson is widely known in Europe as one of the most creative and succesful double bass players in mainstream jazz. Zohar Fresco is least known of the three, native of Israel, but of Turkish origin he is very well acquainted with both western and oriental persussion instruments which makes him invaluable addition to the trio

The creative drive behind many of the compositions on this album is down to either Mozdzer or Danielsson, but the sense of collective musicianship means that the character of each piece is very much dictated by a unity of sound and equality of contribution which rises above the common jazz tradition of composed hook, followed by a row of more or less tediously ego-trip solos.

The music on this album is very communicative, melodic, easy-to-listen. Songs comprise original comnpositions but also improvisations on medieval song, Nirvana's Smells Like Teen Spirit or Komeda's Svantetic. The music is very coherent, rewarding and delivered with best possible quality. ---musicaenepiral.blogspot.com
