During the 1970s and '80s, Frank Sinatra was so disheartened by the state of pop music and by the deterioration of his voice that he kept canceling album projects and recording sessions. This is a real shame because much of his best material from this same period has turned out to be from the very sessions that he quickly abandoned. This continued on until the early '90s, when Sinatra's wife, Barbara, persuaded him to record these two albums of duets. She wanted to get him energized about his career again and also wanted to have a piece of his recorded legacy to call her own (royalties from Sinatra's Capitol recordings go to charity, royalties from his Reprise recordings go to his children, while the ones from both of these duets albums mainly go to Barbara). Both of these albums were huge successes and have actually outsold most of his original releases. The only problem is that they shouldn't have been made in the first place. While neither disc is terrible, they are both pretty bad when held against most of Sinatra's considerable back catalog. This matter only gets worse when all of the songs heard here are famous Sinatra standards done in the same tempos that everybody knows. So, not only is the 78-year-old Sinatra competing against his younger self, he's also competing against the exact versions of songs that he cut in his prime. This two-disc set is really aimed as a gift purchase during the holidays. If you really want to pick up some Frank Sinatra, you'd be better served by getting a two-disc overview of his Capitol or Reprise years than this set. ---Nick Dedina

Capitol repackaged and re-released Frank Sinatra's Duets/Duets II as a slipcased box set to coincide with the singer's 90th birthday. It's not a bad way to acquire the albums if you don't already own them, and it does include one bonus track "My Way" with Willie Nelson, making this version of marginal interest to hardcore collectors. ~ Al Campbell

Say what you will about Sinatra's over-produced Duets and Duets II being the appropriate items to present as the "90th Birthday Limited Collector's Edition" but once again the fans are milked for one more unreleased track. Sinatra and Willie Nelson duet on "My Way," but it's pretty obvious that as long as fans are willing to pay, we'll keep on getting the same-old rehashed tracks their way.

If you don't have this material already, this is probably the best place to get it, but if you're looking to celebrate Sinatra's 90th in a more fitting way, there are dozens of CD that are more worthy of your time. ---Jeff Barlow, amazon.com
