Plagued by increasingly middling album sales, Sarah McLachlan is in a position to take the kind of risks she was probably wise to eschew in the wake of her blockbuster 1997 album *Surfacing*. Though longtime collaborator Pierre Marchand is on board for most of the songs, *Shine On* marks the first time since her 1988 debut that the singer-songwriter has worked on an album with producers other than him. It's also her first effort since her departure from Arista Records. Unfortunately, aside from the use of horns here and there (an apt choice for her debut on venerable jazz label Verve Records), neither of these moves appear to have moved McLachlan to make any substantive changes to her sound, which, since her commercial peak in the late '90s, has inched decidedly away from the alt-rock of her early work in favor of middle-of-the-road adult contemporary.

Best known for his work with such disparate acts as Metallica and Michael Buble, Bob Rock's production on the standout "Flesh and Blood" and the comparatively hard-edged "Love Beside Me" plugs a bit of figurative and literal electricity into the proceedings. forgettable, with songs like "Brink of Destruction" that rarely live up to their typically melodramatic titles. The album's lead single, the string-laden "In Your Shoes," is a so-called empowerment anthem inspired by 16-year-old Pakistani activist Malala Yousafzai filled with platitudes like "live your truth."

When McLachlan fully embraces the smooth-jazz path she's been threatening to go down for over a decade, as she does on "Surrender and Certainty" and "Song for My Father," which is surprisingly less saccharine than you might expect, it at least starts to feel like she's evolving as an artist. But those moments are few and far between on an album that feels longer than it is, which, I guess, is a desirable quality for what is basically glorified background music. ---Sal Cinquemani, slantmagazine.com
