performance recorded in 2009 called From Istanbul to Athens. McKennitt's transition from Celtic balladeer to worldbeat superstar began in the early '90s with the genre-hopping Visit. Her penchant for Mediterranean/Far East/Middle Eastern instrumentation came to fruition on 1994's Mask and Mirror and 1997's Book of Secrets, the latter of which spawned her biggest commercial hit with "The Mummer's Dance." The bulk of Olive and the Cedar is made up of material from those three albums. From Istanbul to Athens mines much of the same material, but draws more heavily from 2006's Ancient Muse. ---James Christopher Monger, AllMusic Review
