1988 debut from the band Vaya con Dios featuring the Belgian chanteuse/lyricist/ producer Dani Klein. Ariola Belgium. ---Editorials Review

Vaya con dios. What is there not to say about this band. This is my favourite band ever. Dani Klein has such an amazing voice... This album has some of the biggest hits and the best songs but also a few dodgy ones like *One Silver Dollar* and *Remember*. But hey... they were searching and they more than made up with their next albums. In this period they still had bside (which they didn't do anymore after the singles on this album, except with the *Roots and Wings* singles) like *Each Day* and *You let me down*. They would have been perfect to replace the two mentioned earlier. But hey, still awesome record but the least i listen to... ---Thomm, rateyourmusic.com
