Here she comes, here she comes, we've been waiting for so long. Indeed, the ex-Nightwish wonderwoman Tarja Turunen is back striking the audiences with an enormously long album "My Winter Storm", filled with numerous bonus tracks and even an Alice Cooper cover "Poison". Tarja's solo project was spellbinding even during the days when she was still singing for Nightwish. After her departure both "Dark Passion Play" (by Nightwish) and "My Winter Storm" were among the most anticipated albums of the year. Nightwish's new album met enormous success. Tarja's solo project seems to be more modest. But we'll see what her album has to offer.

Tarja always stated she was an opera performer after all. Therefore it is visible that the style she's making now is somehow similar to Sarah Brightman. However, compared to the more experienced Brightman My Winter Storm cannot be considered a sensational masterpiece. The positive sides of the album do resemble Brightman. The beautiful choruses, the string ensemble melodies and the mild percussion make the music very enjoyable and create a perfect romantic atmosphere. Nevertheless, when it comes to producing symphonic metal, then the album loses some of its quality. There is not a drop of Nightwish style here. Tarja isn't obviously writing all of the music and has a crew of producers, managers and other people to do the job. Since so many people are working at the music then it's sad but true that the stitches joining the ideas start to unravel in some places. That always happens when it comes to industrial production of music. The minus of the album is that the metal background becomes monotonous by the end. A major danger while composing long releases.

However, Turunen has always been a good singer and she does a fine job on this album as well. We will definitely see her making more good music and developing her own fine style. My personal favourites among the songs of My Winter Storm would be "Die Alive", "The Reign", "My Little Phoenix" and "Lost Northern Star". The beautiful Finnish language ballad "Oasis" is also one of the best tracks of the album. Though I like Mozart's "Requiem" a lot I don't think that using bits of it in the two opening songs of the album would add much to it. Her "I'm never tired when it comes to praising myself" attitude isn't a plus either but at the same time Dark Passion

Play features it as well and whether we want it or not this is an essential attitude for most celebrities.

As a result I'll make a nice clear conclusion. Tarja's My Winter Storm isn't exactly the best album of the year but it shows great potential and I'm sure that a grand future lies ahead of Tarja and she has the talent to create best music. I'll be waiting for her new releases in the future and why not hope for a Nightwish featuring Tarja Turunen project. The hopes are high and for the moment now My Winter Storm receives a magical 7.7. ---Ernis, metalstorm.net
