The Guitar Slingers are without a doubt one of the best bands out there .Want proof just check out any of their 3 albums. What started out in 2007 as basically a one man project by Doyley (the main man of Diablo Records) has now become a truly killer band that has few equals. That said the band has now dropped their latest effort, "Carnevil Of Souls" on a still unsuspecting public and this time their taking no prisoners. We get 11 original tracks that deliver one hell of a knock out punch. This is rockin' psychobilly that at times is infused with spaghetti ,rockabilly and surf. From a circus sideshow opening to a full throttle assault "Carnevil Of Souls" covers a lot of ground and does it well. Highlights include "The Fly With The X Ray Eyes", "Outerspace Out Of Time", "The Invaders" and "The Hitcher".

You don't have to be a fan of psychobilly to like "Carnevil Of Souls", it's much more than that. This is one really impressive rock n roll album and if you say you like rock n roll and don't like this; your a flat out liar. Easily one of the best albums to come out in a while by a band you should be very aware of .Highly Recommended!!! --- reviewsbyslam.blogspot.com
