The 3rd album of Metal Law, the true metallers from Berlin, is titled "Hellrider" and was just released via Metal On Metal Records. Three songs off the album are available below, and Metal On Metal also comments:

"As one can tell from the titles and the cover, these Germans didn't change their style. The only thing that has changed is the recording and production quality - the new album definitely sounds better than the previous 2 albums of the band. This is pure traditional heavy metal for all those metalheads who can never get enough of Iron Maiden, Manowar, Judas Priest, Accept, old Running Wild, Grave Digger, etc." ---xFiruath, metalunderground.com
