Queen of Your Heart is the name of our debut album, it includes only our own songs, we are really proud of that. It is a combination of explosive rhythm 'n' blues, sizzling swing and voodoo rhythms. Songs to the record have collected influence from all over the Europe! "Bahama Mama" was "born" in Düsseldorf, Germany, whereas "Gypsy in Me" has a strong Spanish vibe. On the other hand, despite its name, New York City Bank was written in Helsinki.

I got quite vivid imagination. Sometimes I just see a situation or end up in some place that just has to be captured in a song. So basically I can be inspired by some situation or feeling or I just create a neat melody and go from there.

I usually come up with lyrics and melodies and the mood of the song. Then I meet up with guitarist Markus Tiiro. Together we compose the chord changes and develop ideas further. Final arrangement we do as a band. --- SaraLee, rockabilly-online.com

Fantastic album - just came out on the Rhythm Bomb label! All songs are written by the band. A great mixture of Rhythm 'n' Blues, Rock 'n' Roll, Swing, even alternative Rock elements and Roots music! This album is definitely a must have for those of you who enjoy artists like 'The Hillbilly Moon Explosion', the french female roots music singer 'Zaz', 'The Beat From Palookaville' and for those who just are open to some 'newer' sounds! This is and I really mean that in a positive way no authentic stuff album - this is really an own style album which definitely is it worth to listen to it! If I could give 10 stars it would get 10! A highly recommended A+ release! ---Editorial Reviews, amazon.com
