This collection of Sims' Specialty sides, primarily in a drums and electric guitar format, is pretty hard to beat. It combines all of the original singles, the extra tracks from his lone album plus unissued material and until further alternate takes come to light, the best overview of his tenure with the label. Some tracks are augmented with harmonica and/or string bass, but it's Frankie Lee's guitar and sly vocals that drive things along. Until his early Bluebonnet and later Ace material is cobbled together to complete the picture, this compilation is all you'll need. --- Cub Koda, Rovi
