Pete Cornelius & the DeVilles est 1999, have released 7 full length albums, toured relentlessly, both national & international.

The DeVilles have gone through a few different phases in the past 11 years. Originally a hard hitting Texas blues band, playing tunes from the likes of Stevie Ray Vaughan and Jimi Hendrix. But have now settled into a new groove. Pete's song writing, singing and guitar playing have evolved into something that can't quite be described or put under genre titles, but still remain comfortable in the Blues / Roots camp. ---petecornelius.com
