featuring Upshaw in her prime, which inspired me to reopen my long-forgotten scores of the Debussy mélodies, which I'd studied decades ago and only ever heard performed on disc by a past generation of singers such as Suzanne Danco and Maggie Teyte, whose recordings can now sound somewhat one-dimensional and appear stylistically dated. This recording, in a warm and spacious acoustic, not only gives the songs new colour but makes them seem much more contemporary. The digital sound does full justice to the lovely harmonic treatments of the piano parts, excellently played here.

There are now several recordings by contemporary French vocalists, but they tend to be rather characterless and mundane, as if French song is all in a day's work for them (which it probably is!). The notes and diction may be more perfectly rendered by the French interpreters, but for me, their versions are nowhere near as expressive as Upshaw's. In this recording, the warmth of her personality and, more importantly, her love of this music, shine through and bring out the sheer beauty of these songs. ---C. Orde, amazon.com
